

NOVA ET VETERA

First of all, the band Nova Et Vetera (N.E.V.) is a human and artistic experience which is opened to other disciplines. The first idea was to offer the show that we would have liked to see in live performance.

The music offered by the band consists in gothic tribal rock.

During the show, the musicians follow a pagan ritual, they cover themselves with ashes in order to make their own personalities disappear in favor of those of their animated movie counterparts projected behind them. This is a psychological immersion between unconsciousness and subconsciousness.

DEAD WALTZ

The concept :

On screen ,the animated movie illustrates a tale for adults composed by ten episodes. On stage, musicians embody their musical and emotional feelings.

The story :

At this turning moment when the mind leaves the body, a woman freshly assassinated tries to give this act a meaning.Then pictures run high like fragments of memory. The woman creates an emotional bound with the man, an hypnotic and infanticide father, a puppet indwelt by the spirit of the dead.
